

9. The patch according to any one of claims 1-8, wherein the adhesive agent further comprises an organic acid.

5 10. The patch according to claim 9, wherein the organic acid is at least one kind selected from acetic acid, citric acid and salts of these acids.

ABSTRACT

A patch comprising a backing layer and an adhesive layer disposed on the backing layer and compounded with an adhesive agent and oxybutynin and/or a pharmaceutically acceptable salt thereof, wherein the adhesive agent comprises an acrylic polymer substantially free of both carboxyl group and hydroxyl group and a rubber polymer, in which weight ratio of content of the acrylic polymer to content of the rubber polymer is from 1:4 to 1:19.
